Continuation of 2. NOTE: Neither the Response of March 6, 2003, nor the Amendment of April 8, 2003, addresses the rejection of claim 73 under 35 USC 103(a) as set forth in the final Office action of January 6, 2003 (MPEP 714.02). The "anatomical considerations" mentioned in said Office action relate to the asymmetries of the abdominal aorta and the iliac arteries due in part to the presence of the inferior vena cava. The proposed change would alter the scope of every other dependent claim and would thus necessitate further consideration.
